

# HTML Lists – Practice Tasks

Complete the following exercises to practice Ordered, Unordered, Definition, and Nested Lists in HTML.

- Favorite Foods List – Create an unordered list with at least 5 food items.
- Daily Routine – Create an ordered list showing your routine (5 steps).
- Glossary Example – Create a definition list with 3 computer terms (HTML, CSS, JS) and their definitions.
- Nested List Fun – Create a nested list for fruits: - Fruits - Mango → Yellow, Sweet - Apple → Red, Healthy
